

## **ATTENTION ALL MEDICARE AND ANY OTHER MEDICALLY INSURED PATIENTS**

The Visual Field and Fundus Photo are considered medical testing. These tests will be filed on your Medicare or any medical insurance provided at the time of service. It's important that we receive the primary insurance you are covered under as well as any secondary insurance you have, if applicable.

Any non-covered charges, deductibles for this year, coinsurance, and/or copays will be billed to the address you provided. These charges come directly from the Explanation of Benefits (EOB) that we will receive, after filing, from your Medicare or insurance company that you are covered by.

Patients are responsible for any charges as per the EOB from your insurance company. These charges can not be altered.

Please print, sign, and date as an understanding of this document for the services you will be provided.
